

# Duke Liver Transplant Program

## Overview

The Duke Liver Transplant Program offers comprehensive evaluation and care to patients with liver disease—and has performed more than 1,450 transplants since it was established in 1984.

Our experienced hepatologists, skilled hepatobiliary and transplant surgeons, and specialized nurse coordinators work with other Duke specialists to diagnose and manage liver diseases, including hepatitis C viral infection, nonalcoholic steatohepatitis (NASH), hepatocellular carcinoma (HCC), and glycogen storage disease.

Data from the Scientific Registry for Transplant Recipients (SRTR) shows that Duke's survival rates for adult liver transplants from deceased donors are among the highest in the country.

### One Year Survival Rate

Data from srtr.org 10/9/2018

### Median Wait Time

Data from srtr.org 10/9/2018

## Highlights

- Cadaveric and living-donor liver transplantation
- Special expertise in performing split-liver and pediatric transplants
- Open and laparoscopic resection of primary and metastatic hepatic tumors
- Excellent outcomes in combined multi-organ transplants: simultaneous transplantation of the liver with kidney, lung, heart, small bowel, and/or pancreas
- Screening for clinical trials, which can give patients access to novel therapies
- Clinic locations in Durham and Raleigh

*Duke liver transplant outcomes are consistently among the top 5 in the country.*

## Providers

### ADULT HEPATOLOGY

Carl Berg, MD  
Medical Director  
Abdominal Transplant  
Carla Brady, MD, MHS  
Matthew Kappus, MD  
Lindsay King, MD, MPH  
Andrew Muir, MD, MHS  
Omobonike Oloruntoba, MD  
M. Cristina Segovia, MD

### SURGERY

Debra Sudan, MD  
Surgical Director  
Abdominal Transplant  
Andrew Barbas, MD  
Bradley H. Collins, MD  
Stuart Knechtle, MD  
Kadiyala Ravindra, MBBS  
Aparna S. Rege, MBBS  
Deepak Vikraman, MD

### PEDIATRIC HEPATOLOGY

Alisha Mavis, MD

## When to Refer a Patient

Patients are typically seen in clinic within one to four weeks of referral. Referrals for transplant evaluation are appropriate when patients'

- MELDNa score is 15 or higher. A MELD calculator is available at [optn.transplant.hrsa.gov](http://optn.transplant.hrsa.gov). Click on "Resources."
- Develop liver-disease complications including the development of ascites, spontaneous bacterial peritonitis, variceal bleeding, coagulopathy, hypoalbuminemia, hyperbilirubinemia, persistent hyponatremia, an identified hepatocellular carcinoma or concern for the development of a tumor, and/or decreased quality of life, as indicated by overwhelming fatigue, intractable itching, or severe encephalopathy.
